

COS 301 ASSIGNMENT

GROUP 5 B

Firdous Tayob (13098472)
Sebastian Gerber (12213749)
Godfrey Mathe (13103394)
Daniel King (13307607)
Shaun Meintjies (13310896)
Duran Cole (13329414)
Isabel Nel (1307030)

February 2015

0.1 Architecture Constraints

0.1.1 Technologies that must be used :

- HTML : For handling the structure of the webpages returned by the PHP.
- CSS : For styling the webpages.
- PHP : For handling the creation of webpages and handling client side requests including input.
- MySQL : For handling the databases used in the application.
- CAPTCHA : For preventing spam attacks.

0.1.2 Technologies that may be used :

- PERL : For handling the creation of webpages and handling client side requests instead of PHP.
- Javascript : For handling the creation of webpages and handling client side requests in conjunction with PHP.
- AJAX : For facilitating communication between forms.
